

DMB Technics expands the product portfolio by cooperation with EVERVISION. EVERVISION provides a wide range of mid-size TFT modules, complying in some cases to the industrial standards of Japanese TFT manufacturer. Because of the capabilities in customized LCM business, EVERVISION offer's the unique modular TFT concept, which allows the user to select his tailored TFT module.

Smart Driver with selectable backlight currents

• Feature available

○ Feature available with NRE costs

Solutions for daylight application, long life LED backlight requirements and special touch panel technologies can be offered with focus on best cost / performance ratio. Besides the standard solutions, EVERVISION offers semi-customized TFT solutions to meet special mechanical or interface requirements, or to realize replacements of discontinued TFT modules other manufacturer. In most cases the minimum order quantity is 1kpcs per lot at reasonable tooling costs. Of course these TFTs can have an optional touch panel on board either resistive as well as projected capacitive (CTP). We are looking forward to your interesting RFQ, pls. contact us.
