

Powerful Combination

*We are proud that **TRULY** selected **DMB** Technics as co-operation partner for the European Market.*

Their common market approach fit best, as both companies are strongly focused on the DISPLAY business in relation with custom made products for the industrial-, home appliance and medical industries.

TRULY can offer all state of the art display technologies which are produced in house:

- Passive mono LCD (TN, STN, FSTN, ASTN, WFSTN, VA, MVA etc.)
- PMOLED & AMOLED sizes: 0.5" ~ 4.0"
- TFT (transflective, LTPS etc.), sizes: 1.7" ~ 15.6"

Furthermore based on the strong vertical integration TRULY can offer value added sub-functions, products as e.g.:

- Capacitive touch panels (G+G, G+F, GFF, etc.)
- Cover lens (AR, AG, AF, Anti-IR, Antibiosis, curved etc.)
- Bonding processes as OCA, OCR or DST

We can offer in co-operation with TRULY turnkey solutions including cameras and FPI (finger print sensors).

SMART DISPLAY ONE STOP SOLUTION PARTNER

The big advantage is that all products are long term available (up to 10 years), based on the fact that TRULY has their own facilities to produce all products in house under their control.
